

THE OWL

We the "Owl Staff" have attempted in these pages not only to present a record of the 1960-1961 school year, but also to capture the spirit of Ooltewah High School for the memories of you who read this book in the years to come.

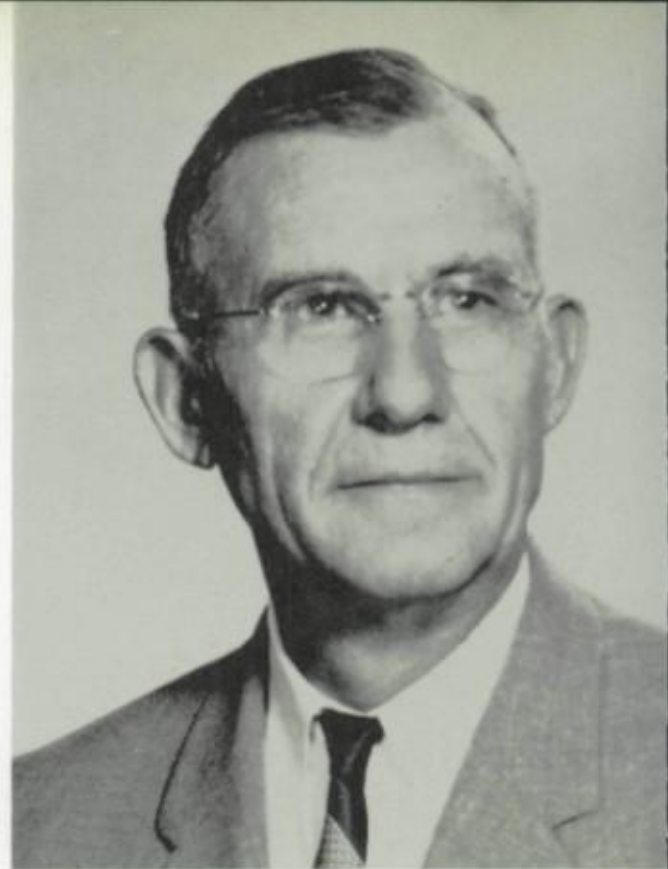

We the Senior Class of Ooltewah High School dedicate the 1961 "OWL" to Miss Jo Ann Coulter in appreciation of her many hours of hard work and service in the athletic department. We are also grateful for her untiring efforts in many of the other activities of the school.

Chapter 3 THE BEGINNINGS OF GOVERNMENT IN THE UNITED STATES

The roots of American government reach deep into the past. Our system of government did not suddenly spring into being as if the wave of some political magician's wand. Nor was it pulled out of thin air by the

Our English Heritage. The French, Spanish, Dutch, Norwegian, and other Europeans settled in parts of what was to become the United States. But it was the English who came in the largest numbers. And it was the English who came to control the thirteen colonies that stretched for 1,300 miles along the Atlantic seaboard.

These early pioneers who cleared the wilderness and fought off the Indians had to look out their own common future in the New World. But there came here in search of greater freedom and their struggle with royal

governments in Philadelphia in the summer of 1787. Rather, it was developed through long centuries of experience. Through struggle and blood. We shall now explore the history of these beginnings.

The Colonial Period

When and how they brought with them political ideas which were to shape the future of the United States. These beginnings with them, the kernel of a democratic government, had been working and developing in England for centuries.

There is no doubt that the ideas of limited government and civil liberties were brought to America by the English. These ideas were not all new to America. They had been with them, too, the twin ideas of limited government and civil liberties. That is, that government is not all powerful; that government is limited in what it may do, and, especially, that it is limited in the sense

Early Americans had to look out for themselves, or they would not survive. This was called "government as order to live." The beginning of our government today.

of which we are to be found today—county, borough, city, sheriff, coroner, and justice of the peace, for example. And all of these were well known in England long before the first Englishman ever landed in America.

(1) *The First Concepts of Limited Government and Civil Liberties.* They brought with them, too, the twin ideas of limited government and civil liberties. That is, that government is not all powerful; that government is limited in what it may do, and, especially, that it is limited in the sense

that each man has certain rights that government cannot injure or take away. These great principles of freedom were proclaimed in such historic English documents as the Magna Carta in 1215, the Petition of Right in 1628, and the Bill of Rights and the Act of Toleration of 1689.

(2) *The Concept of Representative Government.* A third vitally important concept brought to America in English ships was that of representative government. For centuries there had been developing in England the
